

# Thoro-Graph

## RACE OF THE WEEK

### Saratoga

### The Jim Dandy

### 1-1/8M – 3YOs

### Sunday, August 3, 2003

#### **In Alphabetical Order**

**Awesome Time** – Managed to win a big purse last time while running only a 7 because he saved ground (1w,1w upper-left on the sheet.) Healthy 3-year-olds shouldn't be cycling out of form this badly between tops, and while this cycle is shorter, there is absolutely no reason to think that he will make the 5 point jump necessary to even hit the board.

**Congrats** – Is a well-bred colt with decent numbers, but we are in the era of “Super Trainers” and super fast horses. He is overmatched here. Two things to note about full brother **Flatter** (far right column of page): he has gotten better with age, which augurs well for this colt's future, and he has only 6 lifetime starts to the middle of his 4-year-old year, which does not.

**During** – Thoro-Graph figures take both weight carried and ground loss into account – and both were instrumental in this colt's Swaps win – he got a rail trip (1w,1w, upper left of the page) and a weight concession, and only earned the 4<sup>th</sup> best figure in the race. In this one we don't like his chances – he's one of the slowest horses, has not gotten back to his best at a time when he should be moving forward, and spots weight to fast horses.

**Empire Maker** – We post the “last 90 days” stat to help identify the Super Trainers, those who dramatically (and often suddenly) move up horses. Frankel certainly qualifies, although he has been doing it since the Spring of 2001, and he is one of 4 Super Trainers with horses in the Jim Dandy. Empire Maker pounded out 4 straight big ones before taking a break, and there is no reason to think he won't run at least as well now – Frankel is great with fresh horses, the rest probably helped, and both sides of the pedigree indicate improvement with age.

But—the conditions of the Jim Dandy force Empire Maker to spot significant weight, and this will be no easy task. Five pounds of weight carried is worth a point on the Thoro-

Graph scale, and Bailey has a history of riding him like he's much the best (4w,4w in the Derby, etc...), which could cost him a couple of lengths as well – each path on each turn is worth a length at the finish, or ½ Thoro-Graph point at this distance. All in all, Empire Maker will probably have to run a new top to win – which he certainly could do, but do you want to take a short price on it?

**Nacheezmo** – Is trained by another Super Trainer, but Bond doesn't get the attention Frankel and Pletcher do because he doesn't have the same level of stock. This colt improved dramatically when stretched out in April, and other than one stinker when he had trouble, his 3 other efforts were huge. There is some chance that pair-up of big ones will cause a bounce, especially since they have come only 2 weeks apart, but at the weights his top is better than that of Empire Maker going in (8 pounds is worth about 1 ½ points), and he has run it 3 times. Contender, value.

**Strong Hope** – Is trained by another Super Trainer, and this horse has done nothing wrong, improving steadily, and his last was very good, putting him there with the best of these, but there are negatives here. First of all, with each forward move it becomes increasingly likely his limit has been reached, at least in the short-term, and at this point a repeat is more likely than another forward move, and a bounce is possible. Also, while he gets a little weight from Empire Maker, Strong Hope spots significant weight to other fast horses.

**Tafaseel** – Is trained by the 4<sup>th</sup> Super Trainer, and McLaughlin's horses have been running out of their minds. Maybe it was the addition of Lasix and blinkers (and maybe not), but this colt's last two were enormous. After adjusting for weights he is the fastest horse (best top), and with 4 weeks rest there really is no reason to expect him to back up. Making the jump from a 1<sup>st</sup> level allowance could help the price. (although not as much as it would have 15 years ago when fewer people had figures), so this one is a strong contender, and value.

# Thoro-Graph

[Click here for our online introductory materials.](#)

**The two most important questions in assessing a race are:**

**How fast is each horse?**

**How fast is it going to run today?**

Thoro-Graph answers the first question by creating accurate performance figures. By placing the life history in figures on a graph, we allow you the opportunity to attack the second question with confidence.

Each number on a sheet represents a performance rating arrived at by using time of the race, beaten lengths (a proprietary formula different than generally used), ground lost or saved, weight carried, and any effects wind conditions had on the time of the race.

All this information is refined with a carefully crafted track variant down to one number for each horse in every race. **The lower the number, the better the race.** With few exceptions there will be a figure for every race a horse has run for the last four years.

Thoro-Graph figures are represented numerically and in a clear graphical format that is easy to read and understand. The format makes it possible to compare horses which have run under different conditions, different distances, at different tracks, and on different days. Any handicapper or horseman can examine each horse's history, form cycle, and relative ability in today's race.

With little practice, you'll be able to identify each horse's distinct form cycle. Some run consistent patterns, varying from a simple good race/bad race pattern, a series of bad races after an exceptionally good effort (the "bounce"), or more complex "circling" patterns where a horse gradually loses its form then slowly comes around toward its original level. A "sheet player" can anticipate these moves and select horses which are not obvious to the general public. Another simple pattern is how a horse performs off a lay-off, whether it improves second time, and so on. And the information is shown for up to four years.

Of course there are infinite variations in how horses run and no two are alike. There are no hard and fast rules on how to interpret patterns and form cycles. Every handicapper will come up with his or her patterns they like or dislike. Some people will only bet long shots. Others just want to have fun and cash a race no matter what the return. Whatever your style, Thoro-Graph provides all you need to make you a better, more informed player.

It may take a little while to get the hang of reading our format, but if you stick with it, you'll realize Thoro-Graph is everything you need to win.

# Thoro-Graph [Click here for our online introductory materials.](#)

## The Basics

The lower the number the faster the race. On our scale 1 point = ~1 length at 5 furlongs increasingly to 2 lengths at 1 1/4 miles. Each sheet has 4 calendar years going back from right to left. The last race a horse ran would be the uppermost number in the rightmost column corresponding to the horse's age.

5 pounds in weight = 1 point at all distances. The figures are adjusted for weight carried in previous races. If 2 horses run a TG figure of 10 today, a horse in at 115 will beat a horse in at 120 by 1 point, or 1 length at 5f.

Each path out from the rail (1 path) = 1 length of ground loss. Considering all else equal, in a 1 turn race a horse in the 3 path runs 2 lengths better than a horse on the rail.

Our figures are not adjusted for horses that are off poorly or stumbled from the gate. Appropriate notations are made next to the figure.

Dirt figures  $25^1 = 25 \frac{1}{4}$   $25^2 = 25 \frac{1}{2}$   $25^3 = 25 \frac{3}{4}$  Turf races are denoted by "-" e.g. -25 is 25 on the turf.

## Typeface key

Races 5 1/2 furlongs and less are in *italic light face* e.g.  $25^2$

Races 6 furlongs to less than 1 mile are in light face e.g.  $25^2$

Races 1 mile to 1 1/8 miles are in **bold face** e.g.  $25^2$

Races more than 1 1/8 miles are in ***italic bold face*** e.g.  $25^2$

## Race summary key

Up to 8 running lines are provided for each horse. From left to right, the running line denotes race date, track, race#, track condition, distance, race condition, finish position, beaten lengths, weight, odds, Thoro-Graph figure, path, and equipment/medication information. All trainer changes, not just claims, are listed.

quit Stopped - final figure not representative

## Auction Prices

The sale price for all thoroughbreds sold at public auction through Summer 2001 as a (W)eanling, (Y)earling, or (2)-year-old are shown at the bottom of a horse's 2-year-old column.

## Trainer and sire profiles

Trainer profiles with unusually good ROI (Return on Investment based on a \$2 wager) will be shown on the sheets in **bold**. A poor ROI will be in *italic*. The TGI (Thoro-Graph index) for sires is the average figure achieved by all their offspring. Statistics are based solely on North American starts.

## **New!! Dam-Side Data**

Sheets for all horses less than 5-years old will include the race records (North American from 1992 on) for each dam and her other foals and their best Thoro-Graph figure broken down by year, sprint, route, surface and track condition. An asterisk, \*, besides the dam or foal's name indicates that the horse may have raced before 1992 and those races are not included. A dash, --, in the data category means the horse did not race, so no figure. A question mark, ?, means we don't have figures for those races.

Thoro-Graph figures are calculated from data compiled from several sources including Equibase Company LLC. Data provided or compiled by Equibase Company LLC (which includes data from The Jockey Club) and/or Thoro-Graph Inc. generally is accurate but occasional errors and omissions may occur as a result of incorrect data received by others, mistakes in processing, and other causes. Thoro-Graph Inc., Equibase Company LLC, and The Jockey Club disclaim responsibility for the consequences, if any, of such errors but would appreciate their being called to their attention.
