

Thoro-Graph

**The two most important questions in assessing a race are:
How fast has each horse run in the past? How fast is it going to run today?**

Thoro-Graph answers the first question by creating accurate performance figures. By placing the life history in figures on a graph, we allow you the opportunity to attack the second question with confidence.

Each number on a sheet represents a performance rating arrived at by using time of the race, beaten lengths, ground lost or saved on the turns, weight carried, and any effects wind conditions had on the time of the race.

All this information is refined with a carefully crafted track variant down to one number for each horse in every race. **The lower the number, the better the race.** With few exceptions there will be a figure for every race a horse has run for the last four years.

Thoro-Graph figures are represented numerically and in a clear graphical format that is easy to read and understand. The format makes it possible to compare horses that have run under different conditions, at different distances over different tracks, and on different days. A handicapper or horseman can examine each horse's history, form cycle, and relative ability in looking at today's race.

With a little practice, you'll be able to identify form cycles. Some run consistent patterns, varying from a simple good race/bad race pattern, bad race after an exceptionally good effort (the "bounce"), or more complex "circling" patterns where a horse gradually loses its form then slowly comes around toward its original level. Using our data it is possible to anticipate these moves and select horses which are not obvious to the general public. We also provide very sophisticated data that enables the handicapper to evaluate trainers and pedigrees when deciding how a horse will perform under different circumstances.

Of course there are infinite variations in how horses run and no two are alike. There are no hard and fast rules on how to interpret patterns and form cycles. Every handicapper will come up with his or her patterns they like or dislike. Some people will only bet longshots. Others just want to have fun and cash a race no matter what the return. Whatever your style, Thoro-Graph provides all you need to make you a better, more informed player.

It may take a little while to get the hang of our format, but you'll realize quickly **Thoro-Graph is everything you need to win.**

The Basics

The lower the number the faster the race. On our scale 1 point = ~1 length at 5 furlongs increasingly to 2 lengths at 1 1/4 miles. Each sheet has 4 calendar years going back from right to left. The last race a horse ran would be the uppermost number in the right-most column corresponding to the horse's age.

5 pounds in weight = 1 point at all distances. The figures are adjusted for weight carried in previous races. If 2 horses run a TG figure of 10 today, a horse in at 115 will beat a horse in at 120 by 1 point, or 1 length at 5f.

Each path out from the rail (1 path) = 1 length of ground loss. Considering all else equal, in a 1 turn race a horse in the 3 path runs 2 lengths better than a horse on the rail.

Our figures aren't adjusted for horses that are off poorly or stumbled from the gate. Notations are made next to the figure.

Dirt figures $25^1 = 25 \frac{1}{4}$ $25^2 = 25 \frac{1}{2}$ $25^3 = 25 \frac{3}{4}$ Turf races are denoted by "-" e.g. -25 is 25 on the turf.

Typeface key

Races 5 1/2 furlongs and less are in *italic light face* e.g. 25^2

Races 1 mile to 1 1/8 miles are in **bold face** e.g. 25^2

Races 6 furlongs to less than 1 mile are in light face e.g. 25^2

Races more than 1 1/8 miles are in *italic bold face* e.g. 25^2

Race summary key

Up to 8 running lines are provided for each horse. From left to right, the running line denotes race date, track, race#, track condition, distance, time of race, race condition, finish position, beaten lengths, weight, odds, Thoro-Graph figure, path, and equipment/medication information. All trainer changes, not just claims, are listed.

<u>Summary code key</u>		<u>Track condition key</u>	
BAR	Barshoe or aluminum pad worn	gd	Good (dirt or turf)
bl	Blinkers	my	Muddy
f	Front bandages	sy	Sloppy
FC	Front caulks	wf	Wet fast

FBC	Front and back caulks	yl	Yielding
L	Lasix	❖	Synthetic Track
B	Bute		
N	Nasal Strip		

<u>Graph code key</u>					
st	Stumbled start or during race	T	Big trouble during race	time?	Time of race is in question
gate	Fractional gate or ran off	tu	Taken up, steadied, or checked	●	Change of equipment, medication, etc.
op-	Off poorly less than 2 lengths	X	Ran on a dead rail		See details in race summaries
op	Off poorly ~2 lengths	\$	Heavily bet for no obvious reason	▲	Lasix on (incl 1st Lasix)
op+	Off poorly 4 or more	!	Buried race faster than appears to public	▼	Lasix off
rank	Erratic, buck jumped, jumped shadow	h?	Horse may not have been extended	■	Trainer Change
bled	Bled during race	h_pace	Unusually fast pace	◆	bute on or off
bi bo	Bore in bore out	s_pace	Unusually slow pace		
quit	Stopped - final figure not representative				

Auction Prices

The sale price for all thoroughbreds sold at public auction through Summer 2009 as a (W)eanling, (Y)earling, or (2)-year-old are shown at the bottom of a horse's 2-year-old column.

Trainer and sire profiles

Trainer profiles with unusually good ROI (Return on Investment based on a \$2 wager) will be shown on the sheets in **bold**. A poor ROI will be in *italic*. The TGI (Thoro-Graph index) for sires is the average figure achieved by all their offspring. Statistics are based solely on North American starts.

Figure-Based Trainer Profiles - Chart on following page

1-- The studies are based on the "effective top" of each horse at the time of the race being measured. Effective top is defined here as the horse's best figure from his last six starts, or last 12 months if he ran less than 6 times during that period. This means, for example, that when we look at an instance of a trainer running a horse second off a layoff, that effort is compared to his previous six runs at that time.

2-- The efforts being measured are broken out into 4 categories--

- "new top", defined as more than one point better than the previous "top",
- "pair", defined as one point better or worse inclusive than the previous top,
- "off race", defined as more than a point worse but less than 4 points worse than the previous top,
- "x", defined as 4 or more points worse than the previous top.

3-- For the categories measuring how a trainer's horses do following a top, a pair of tops etc., we only used horses that have run at least 6 times for the trainer.

4-- We did not use a sequence where there was a trainer change in the last 3 starts (except for the "trainer change" studies). We are going to take a look at this and decide whether that is the right way to go or not.

5-- The bold face and italics indicate significantly higher or lower than average, respectively, not better or worse. Meaning, a trainer with a bold face "x" group in a category is getting more BAD performances than most.

6-- We are comparing efforts to tops on the same surface only--if a horse raced on dirt we compared his effort to his best dirt number within his last 6 starts on any surface.

Dam-Side Data

Sheets for all horses less than 5-years old will include the race records (North American from 1992 on) for each dam and her other foals and their best Thoro-Graph figure broken down by year, sprint, route, surface and track condition.

An asterisk, *, besides the dam or foal's name indicates that the horse may have raced before 1992 and those races are not included. A dash, --, in the data category means the horse did not race, so no figure. A question mark, ?, means we don't have figures for those races.

Thoro-Graph figures are calculated from data compiled from several sources including Equibase Company LLC. Data provided or compiled by Equibase Company LLC (which includes data from The Jockey Club) and/or Thoro-Graph Inc. generally is accurate but occasional errors and omissions may occur as a result of incorrect data received by others, mistakes in processing, and other causes. Thoro-Graph Inc., Equibase Company LLC, and The Jockey Club disclaim responsibility for the consequences, if any, of such errors but would appreciate their being called to their attention.

Guide to the Thoro-Pattern

Thoro-Pattern studies are broken out by age and time and using horses that have run at least six times – the three starts of the pattern (0-2-X etc.), plus at least three starts before that, in order to establish an effective previous top to compare to. Each of the last four – the three of the pattern, plus the one being measured – had to be within 42 days of the previous start, and all for the same trainer. The three runs in the pattern and the one being measured all had to be on the same surface (either dirt or turf), and either all sprints (less than a mile) or routes (a mile or more).

The numbers are compared to the “effective top” of the horse, which for the purposes of these studies was defined as the best figure the horse had run in the last 6 starts before the three race pattern began. If the horse runs better than that within the three race pattern, that figure becomes his effective top. Dirt patterns compared the race being studied to the horse’s dirt top, turf patterns to his grass top.

We do not make distinctions when we output the sheets. In other words, if a horse is coming off an 0-2-X, with the races six months apart, some grass and some dirt, we are printing the 0-2-X stats, even though they don’t really apply. We are doing this so you have something to work with, but it means you have to make distinctions. You can’t always take the results at face value for every horse – you have to handicap. Was there a significant trainer change that affected the pattern, or affects your opinion about what the horse will run today? An off race on a surface the horse doesn’t like last time out? Is the horse heavily raced, making improvement less likely than on average for the pattern?

The patterns shown are the ones for the surface today’s race is carded for, regardless of what surface the horse has been running on, and the effective top used will be the horse’s best number, regardless of surface or distance. The same categories apply as for the figure-based trainer studies – “top” means more than one point better than his previous effective top, “pair” means within a point either way of that effort, “off” means more than one point through four points worse than the effective top, and “X” means worse than that.
